

The background image shows a rugged, arid landscape with mountains in the distance. In the foreground, there is a large pile of light-colored earth or rock. Two large drilling rigs are visible: one on the left and one on the right. The rig on the right is orange and has a long vertical mast. The rig on the left is white and blue. The sky is filled with dark, heavy clouds.

The First Services And Excavation Co.LLC

What We Do
Drilling And Blasting
Mining Operations
Quarry Management
Earthwork

About Company

- The **FIRST SERVICES AND EXCAVATION CO. LLC** were established in 2012 as a specialist in Drilling & Blasting operations sub-contractor and has since developed into one of the leading Drilling and Blasting contractor using our core competencies.
- The **FIRST SERVICES** bring a host of capabilities to the extensive Drilling & Blasting projects through an integrated approach that spans the life cycle of mining to professional & support services.

The First Service Managing Team

- “The company’s top management comprises seasoned professionals with several years of experience in Drilling & Blasting. We have successfully steered the company through the major milestones that done its evolution as a leading national Drilling & Blasting company.”
- We are striving to make the **First Services** one of the leading service provider by continuously enhancing our process. We believe strongly in the competitiveness of the Oman market and the unique challenges that our environment creates for us to be world-class. As business and corporate citizens, we are committed to contributing to the growth of the nation and this is where we believe our deep-rooted values set us apart.
- Along the way we have learned hard-won business lessons on breaking from conventional practices and taking on challenges, bringing a great deal of expertise to our clients and strengthening the company both, technically and at the management level.
- We owe our deepest gratitude and respect to the employees of **First Services**, who are the real champions of the company without their hard work and commitment, **First Services’** growth would not have taken shape. Guided by values, we are fortunate to have people within the folds who not only believe in these values but also strive to take it to greater heights.

Vision

- To be a respected world-class mining & earthwork organization known for quality, reliability, timely, completion and a safe working environment.
- To provide a climate of transparency, mutuality and continuous learning to its employees.
- To be a responsible corporate body by committing to enhance the life quality of the community.

Innovation – Dedication – Honesty.

- At the First Service we believe that innovation is the cornerstone to better service, better quality and speed.
- Our dedication is to our customers and to our employees with a commitment to the highest professional standards.
- We pledge to treat our stakeholders with the utmost respect, professionalism, honesty and integrity.

Quality

- The First Service is an extremely quality conscious organization. Our benchmarks are set high and we strive to achieve the highest level of quality in all its undertakings. We are committed improvement of our drilling and blasting operations by achieving the following objectives:

Quality objectives

- Adapting safe procedures in execution process.
- Delivering quality output at economical cost.
- Having effective control over unproductive works
- Having effective preventive maintenance

Our Quality Policy

- To provide the highest customer satisfaction by providing high quality drilling & blasting and delivering the project always on time.
- To innovate the process and services throughout the project life-cycle.
- Utilizing the latest and most advanced technologies.
- Continuous training of our employees.
- Gaining the highest customer satisfaction ratings.

Activities

1. DRILLING & BLASTING.
2. MINING & QUARRY OPERATION.
3. EARTHWORKS & LANDFILLING.

Drilling and Blasting

- The First Services Blasting Company is Oman owned and operated explosive products manufacturer serving the construction and mining industries. Over the last several years, our research & development teams have worked on refining and improving our products for large and small customers. Detonator blasting manufacture of Emulsion explosive and ANFO. We also provide a complete line of initiation systems including non-electric and electronic detonators and other accessories. As a complement to our manufacturing capabilities, First Services provides safe transport and delivery of packaged ANFO & emulsion. We own a fleet of trucks, which allows us to extend our exceptional service from orders to production to delivery of product to our clients.
- First Services as a seasoned professional with experience of 10 years, have objective to meet the ever-growing Explosive manufacturing, Storage & Supply, all type of Drilling and Blasting in Sultanate of Oman.
- The First Services established in the year 2012 with the authorized to manufacture, import supply of Commercial Explosives, Wear specializing in the application of high explosives for controlled blasting for the excavation of rock and reinforced concrete on both land and water. With a work force having many years of combined experience in controlled blasting, DBCC Chase developed the expertise needed to provide the construction, utility, pipeline, mining and aggregate industry with state-of-the-art precision drilling and blasting services. We also serve clients for supply of indoor and outdoor fireworks and transport of hazardous cargo. All our activities and services are approved by the Royal Oman Police.
- **OUR STRENGTH**
The Management has a strong back ground of running prominent companies which are excelling in their respective activities. Though keeping up the culture of promoting competitiveness, the philosophy of business lies in cross using of services available in the group companies which will help to avoid procedural delays and facilitate fast execution of projects

- OPERATIONAL SYSTEMS

FSE is committed to the principles and practices of Quality Management throughout all aspects of the company's operations. Our Company is "Grade – A" in various categories of Business, which is provided by Commercial Registrar.

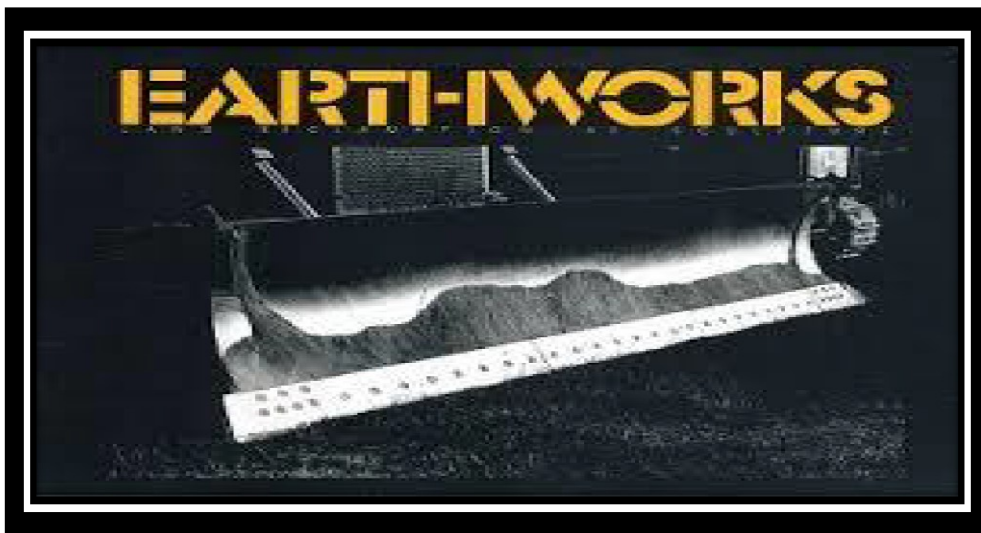

Mining and Quarry Operations

- Quarrying is a form of open pit mining from which the required building materials in the rock and sand are extracted. Though quarrying is also used for the extraction of materials, our company is involved purely in the extraction of dimension stone, construction aggregates, riprap, sand, and gravel. The above materials are also mixed with asphalt and concrete for the formation of aggregates which is required in massive quantities. We also undertake mining to extract the polished stones.
- Our mining operations have caused the minimum of impacts to the environment and considering the benefits that we have to offer to the local administration and population we have been the preferred company operations across Oman.

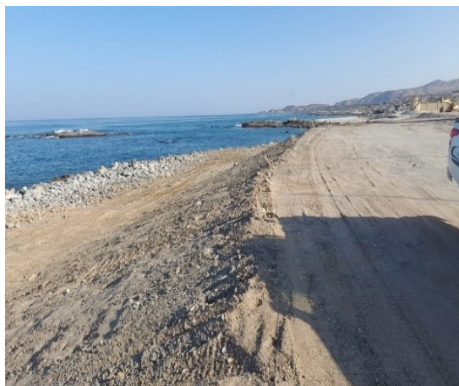

Earth and Land Filling

We perform excavation for a wide variety of purposes including the following: -

1. Trench Excavation.
2. Cutting & Filling.
3. Bulk Materials Transportation.
4. Demolition of Structures.
5. Crushers for the supply of materials.
6. Site preparation Works.

In addition to excavations, our company can also perform demolitions and removals of existing structures at a project site to make way for new structures. If you need an earthwork company to perform a technical analysis of all the permissible restoration options for a new site, including a detailed assessment of their ecological impact on the surrounding area, we can do that as well.
